

Solar Capture

Environmental Policy Statement

Solar Capture is committed to protecting the local, national and global environment. To minimise environmental impacts concerning our activities in manufacturing solar products we shall:

- Solar Capture senior management team are committed to ensure that the protection of the environment is firmly embedded in the business culture influencing its internal and external stakeholders.
- The company is fully aware of its obligations under current environmental legislation and is fully committed to meeting those and other contractual obligations which affect its operations.
- Encourage environmental protection among its suppliers and subcontractors
- Continuous improvement of systems, educate, train and motivate employees to be environmentally aware and responsible controlled through personal goals and objectives
- Evaluation of the environmental impacts of all of its business activities and facilities and take appropriate action. Specifically, action will be based upon the application of the following hierarchal approach:
 - Aim, wherever practicable, to **eliminate** the use of environmentally damaging substances, materials and processes, and then
 - **Prevent** pollution
 - Aim to **reduce**, directly and indirectly, the company's emissions of carbon dioxide
 - Aim to **reuse** as much as possible, and then,
 - Maximize opportunities for **recycling**, and then
 - Aim to **minimize waste** and pollution and develop environmentally sound waste management procedures
 - Maximize the opportunities for using **renewable energy sources**

Successful Environmental Management is a key management objective and is achieved through the development and implementation of a formal Environmental Management System.

This policy statement will be made available to all stakeholders and will be reviewed on an annual basis.
