

Solar Capture

Quality Policy Statement

Solar Capture Technologies aims to have 100% customer satisfaction and zero product failures or returns. This is achieved by;

- Understanding the requirements of our customers and other stakeholders.
- Manufacturing of products in a safe working environment.
- We are committed to establishing and reviewing objectives as part of our continuous improvement efforts.
- Developing innovative solutions which meet customer requirements whilst satisfying regulatory constraints.
- Continually developing staff competencies in line with current and future requirements.
- We are committed to meeting applicable requirements.
- Operating and continually improving a quality management system which meets the requirements of ISO9001:2015.
- Ensuring all staff are trained in the operation of the quality management system.
- Regularly reviewing our systems to ensure that they remain effective.
